

## The Minder - Buggy Shelter

This aesthetically pleasing Silver (RAL9006) buggy shelter is manufactured from high grade components and provides a splendid solution for helping to promote safe & secure area for Buggy's to be locked and left. An internal rail allows Buggy's to be locked with a simple combination lock.

Generously proportioned, the shelter is constructed from recycled aluminum resulting in high resistance to corrosion due to its anodised finish, coupled with low maintenance.

The roof is glazed with twin wall translucent polycarbonate sheets (6mm thick) which are secured within the aluminium construction. This gives the shelter unrivaled durability and ensures maximum stability.

The side panels are glazed with 5mm UV stable PET and are UV stable. 5mm polycarbonate.

Units can be easily adapted and installed end-to-end or side-by-side to create larger areas. Other colours are available on request but will be subject to lead times & an additional charge.

The shelter is supplied with all fixings and can be on a Supply Only or Supply & Install basis.

Other configurations are possible and other colour option to Silver can be made available
